PCSS Post Secondary Spotlight

So, you want to be an ...

Architectural Technologist

Are you passionate about designing innovative spaces that shape the world around us? NAIT's Architectural Technology program is the perfect fit for those ready to transform their creativity and attention to detail into a rewarding career. Architectural technologists are key members of architectural teams who translate design concepts into graphic images, then into technical drawings and specifications that ultimately result in the creation of the built environment.

As a student in our program, you'll acquire the essential skills needed to thrive in this dynamic field. From free-hand sketching techniques to computer-aided drawing skills, you'll learn to craft graphic images and technical drawings that bring architectural visions to reality.

You will also have the chance to participate in a co-op program to further your skills and gain practical work experience all while establishing invaluable connections with industry.

Our program equips you with the skills and knowledge to pursue a wide range of exciting career opportunities with architectural firms, construction companies, government agencies, and much more.
