

PCSS Post Secondary Spotlight

So, you want to be a... Parts Technician

About the Parts Technician Apprenticeship

Are you self-motivated and enjoy working with a variety of customers. The Parts Technician requires an organized and detailed mindset. If you choose this path, you will have a variety of industries to work in.

As a Parts Technician, you will learn to manage and dispense parts inventories. You may also be responsible for stock handling, identifying and cataloguing parts and assemblies, as well as ordering, receiving, inspecting, sorting, pricing and selling.

Your technical training will incorporate hands-on learning. You may have opportunities for field trips and guests speakers

Parts Technicians are employed by wholesale and retail businesses and warehouse distributors that deal with all types of parts. You may begin working as stock or receiving clerks or drivers. As you become acquainted with the different parts and their applications and the stockroom system, you can be promoted to parts counter positions, or you could advance to supervisory positions.
