

PCSS Post Secondary Spotlight

Business Management Certificate

This one-year program will provide you with the foundational business concepts that will prepare you for an entry level business position or act as springboard for completing your Business Management diploma.

Through industry focused instruction, you will develop business management, marketing, and accounting skills that will help you manage valuable resources, such as people, money, time and materials, and reach organizational goals in today's technologically complex and competitive business environment.

Graduates of the Business Management certificate have the option of enrolling into the [Business Management Diploma - General Management Major](#) program.
